

**The Graduate School of Marine Science and Technology, Tokyo
University of Marine Science and Technology**

**“Development of WISE Program (World-leading Innovative &
Smart Education) Program to foster AI(Artificial Intelligence)
Professionals for Marine Industries”**

**Application information for the April 2022 period
【Master's program】**

July 2021

Development of WISE Program (World-leading Innovative & Smart Education) Program to foster AI(Artificial Intelligence) Professionals for Marine Industries (“the Program”) recruits program students (master's program at our university).

1. Overview of the Program

In modern society, the marine industry workforce is expected to decrease. Development of WISE Program (World-leading Innovative & Smart Education) Program to foster AI(Artificial Intelligence) Professionals for Marine Industries develops researchers who will lead diverse fields in domestic and international research communities as well as in other countries. As such, we build innovative systems, create diverse values, and re-establish the international presence of Japan in the global marine industry. The Program is established as an educational program for a five-year integrated graduate school course where all activities, including coursework, thesis writing, and evaluation of the written thesis, help students earn a degree in an organic and synergic manner.

The program assumes a five-year consistency (two-year master's program + three-year doctoral program) and will be completed at the end of the doctoral program five years later.

We are soliciting proposals from students who understand the Program’s vision and would like to participate in the program.

Diploma policy

① Characteristics of personnel in the Program

Innovators, advanced professional engineers, and marine policymakers with technical literacy in big data analysis and machine learning capable of evaluating AI performance accurately and leading the social implementation of AI based on expertise and extensive field experience learned at TUMSAT.

② Skills and qualities to be learned by students

In addition to the diploma policy of each graduate school, the Program’s students acquire the following skills and qualities:

- Knowledge and skills in the data science fields, including big data analysis and machine learning, to perform social implementation of AI
- Clear understanding of issues in their own areas of expertise that may be resolved with data science (big data and machine learning) and the ability to plan, propose, and implement technologies to solve such issues
- Ability to develop, verify, and analyze the results of research projects that scientifically evaluate efficacy and validity of application cases of big data and machine learning towards social implementation of AI
- Competent decision-making and communication skills to disseminate results of big data analysis and machine learning with the public (for students in the fields of resource assessment and management)
- Accurately interpret results of big data analysis and machine learning in

a scientific manner and make full use of the results (for students in the field of marine observation)

2. Curriculum and requirements for completion of the Program

In addition to completing the coursework of the Graduate School to which the student belongs, all students who study in the Program must take subjects that are offered by the Program and earn credits as shown below. Students must pass Qualifying Examination and the Program's completion review provided by Quality Assurance Unit ("QAU") .

Students who complete the Program earn doctor's degree of Marine Science or doctor's degree of Engineering. They also receive a certificate of degree with a note stating that they have completed the Development of WISE Program (World-leading Innovative & Smart Education) Program to foster AI(Artificial Intelligence) Professionals for Marine Industries.

If you complete the master's program without going on to the doctoral program, you will not have completed this program, but you will be awarded master's degree of Marine Science or master's degree of Engineering.

*About the Program completion review

The Program completion review will be conducted by QAU during the third year of the doctoral course.

Master's course completion requirements

	Classification	Subject title	Required credits
Required	" WISE Program"Common subjects ※1		
	AI (machine learning)	Artificial Intelligence and Machine Learning (2)	5
		Deep Learning (2)	
		Exercise in Machine Learning (1)	
	Big data	Data Science (2)	5
		Data Engineering (2)	
		Exercise in Data Science (1)	
Collaboration with different fields	Marine AI Workshop I	1	
Elective	"WISE Program" in each major Designated subject ※2	" WISE Program" designated subjects in each major	4
Required	Lecture subjects, practice subjects, experiment subjects and training subjects of specialization		4
	Special seminar of specialization		4
	Research of specialization		8
Total			31

* 1 Each subject will be established as a Graduate School Common Subjects.

* 2 Each subject is designated in each major.

3. Application period and qualifications

[Schedule A]

Master's Program 2022 enrollment

(1)Application period : February 1-8, 2022

(2)Number of applicants : About 10 peoples

(3)Qualification requirements : Satisfy the following ① and ②.

- ① Those who are scheduled to enroll in the first year of the master's program at our graduate school in April 2022.
- ② Those who are willing to continue on to the doctoral program of the University after obtaining a master's degree and have goals that match the educational and research principles of this program.

*** Important:** If you have applied for the selection of students for the master's program at our university, you can apply even before the announcement of the results.

Master's Program 2022 enrollment

(1)Application period : February 1-8, 2022

(2)Number of applicants : Some people

(3)Qualification requirements : Satisfy the following ① or ② and ③.

In case of (2), the requirement of (4) must also be met.

- ① Those who enrolled in the first year of the master's program at our graduate school in October 2021.
- ② Those who enrolled in the first year of the master's program at our graduate school in April 2021.
- ③ Those who are willing to continue on to the doctoral program of the University after obtaining a master's degree and have goals that match the educational and research principles of this program.
- ④ Those who have completed at least one of the WISE Program Common subjects "Artificial Intelligence and Machine Learning", "Deep Learning", "Data Science ", and " Data Engineering " by March 31, 2022.(If you are currently taking the course, we will judge it as a prospect of acquisition, but if you do not meet the conditions, we will cancel the pass.)

[Schedule B]

(1)Application period : April 5-12, 2022

(2)Number of applicants : Some people

(3)Qualification requirements : Meet the following requirements.

Those who meet the application qualifications for Schedule A and cannot apply for Schedule A due to special reasons (such as boarding for classes).

Those who fail the Schedule A cannot apply.

*** Important: Those who wish to apply on Schedule B should contact Academic Affairs Division in charge of the WISE Program by February 8.**

4. Application method

Please submit 1-3 documents within the applicable period.

As a general rule, application documents should be submitted by email.

[Address for the submission] marine-ai_office@o.kaiyodai.ac.jp

- 1) Application form of the Program
 - 2) Research plan (The dedicated form is attached to this document. The plan must include the motivation for applying to the Program and a statement about the applicant's interests in AI or big data).
 - 3) Transcript of the final school (submitted in the master's program entrance examination)
- * No examination fee is required to apply to the Program.
- * If the applicant studied at any School (undergraduate course) of TUMSAT, a certificate of academic results is not required. Instead, the applicant must

include the student number given at the School in the application.

- * Prior to submitting an application and research plan, the applicant must obtain approval of the main academic advisor.

5. Selection criteria

(1) First selection: document screening

Screening will be conducted based on Transcript of the final school, motivation for the application, and research plan in a comprehensive manner.

- * Please note that the submitted documents may not be changed and will not be returned.

(2) Second selection: interview screening

The interview screening includes a presentation regarding the contents of the submitted research plan (5 minutes) and a subsequent question and answer session (total 15 minutes). The sessions evaluate applicants in a comprehensive manner based on their academic abilities, research skills, and understanding about and motivation for the Program.

6. Application and selection schedule

(1) Briefing session for students

- ① Date and time: 1st September 29, 2022 from 10:30 to 11:30
2nd February 1, 2022 from 15:00 to 16:00

- ② Venue: Online (Cisco Webex)

- * The contents of the 1st and 2nd times are the same.

(2) Screening schedule:

[Schedule A]

- ① Announcement of the result of the first (document) screening:
February 11, 2022
- ② Date of the second (interview) screening:
February 15 and 16, 2022

[Schedule B]

- ① Announcement of the result of the first (document) screening:
April 15, 2022
- ② Date of the second (interview) screening:
April 19 and 20, 2022

- * Interviews will be conducted online using Cisco Webex.

7. Announcement of successful applicants

Successful applicants will be announced on the Program website (<https://www.g2.kaiyodai.ac.jp/marine-ai/>).

Successful applicants will be also notified individually.

[Schedule A]

February 27, 2022

[Schedule B]

April 27, 2022

8. Procedures for participating in the Program

The Program's administration personnel will notify successful applicants of the procedures to participate in the Program.

No additional fee is needed for entry or study in the Program.

9. Supports for students

Students who participate in the Program may receive support for travel expenses for overseas training opportunities offered by the Program. Expenses for implementing the Program may also be supported. Please consult with the Academic Affairs Division in charge of the WISE Program for the details of available supports. In addition to the above supports, the Marine AI Consortium, which is an industry-academia-government collaboration, provides different support opportunities, including 1) matching needs and interests between students studying in the Program and private companies, 2) in-residence projects, where students work in actual projects at partner institutes. In-residence projects will be offered to doctoral course students.

Furthermore, to allow students participating in the Program to concentrate on their studies, financial support for education/research expenses will be provided for students selected by the QAU among those who achieve excellent results in the screening contest.

10. Marine Industry AI Professional Faculty

The program provided hands-on lectures and training for faculty members with the aim of further utilizing AI in research and certified the completion of intermediate AI training.

Please use it as a reference when deciding on an academic advisor.

[AI Intermediate Training Certified Faculty]

11. Handling of personal information

Personal information that is provided in the application documents, including supporting documents and those provided by the Course to which the applicant

belongs, will be used to select successful students who will participate in the Program and to prepare for acceptance, education, and research guidance of successful students.

12. About security export control

TUMSAT thoroughly vets international students when accepting them. The examination is conducted pursuant to the Rules for Security Export Control at the Tokyo University of Marine Science and Technology, which is established according to the Foreign Exchange and Foreign Trade Act of Japan.

13. Document submission destination

Academic Affairs Division in charge of the WISE Program

4-5-7 Konan Minato-ku, Tokyo 108-8477

Phone: 03-5463-0503

Email: marine-ai_office@o.kaiyodai.ac.jp
